

THE FUTURE
OF HEALTHCARE

A photograph of the Liv Duna Medical Center building, a modern multi-story structure with a glass facade and white vertical accents. The building is situated near a river, with trees and other buildings visible in the background. The sky is clear and blue.

Liv Duna Medical Center

Liv Duna Medical Center provides high-level services with top-end medical technology services and expert doctors in Budapest, Hungary. Providing all kinds of outpatient, diagnostic, therapeutic and inpatient services, Liv Duna Medical Center offers an internationally recognised level of health services to the people of Hungary, as well as guests from Europe, the Balkans and the surrounding region. Liv Duna Medical Center aims to work in collaboration with Hungarian Universities and teaching hospitals for academic studies and up-to-date medical developments.

Unique concept and latest technology

Liv Duna Medical Center implements a unique concept for hospital management, the basis of which is exceptional knowledge in healthcare and the ability to utilise the most up-to-date technologies. Patients can experience a holistic, patient-first approach with a big focus on preventive healthcare, as well as professional case management – all supported by remarkable hospitality services.

Liv Duna Medical Center operates in a building close to 20 thousand square meters across 12 floors, with 130 beds and 7 operating theatres in total, one of them being a hybrid operating room supported by our Intensive Care Unit. With 50 different specialities in one building, and the use of the most advanced technologies for the diagnosis and treatment of diseases provides significant advantages in patient satisfaction as well as successful treatment. Our goal at Liv Duna Medical Center is to bring a different and high-level multidisciplinary service approach to private healthcare within the region.

The logo for Liv Duna Medical Center, featuring the word "liv" in a stylized lowercase font with a checkmark-like shape integrated into the 'i', followed by "DUNA" in uppercase, and "MEDICAL CENTER" in a smaller uppercase font below it.

— MEDICAL CENTER

Who is Liv?

Liv Hospital started out with one hospital in 2013 – now operating with 8 hospitals in Turkey and 3 hospitals abroad, Liv Hospital brings a new and modern concept to the healthcare sector by combining its patient-oriented approach and experienced physician staff with holistic and multidisciplinary practices.

Leading International Vision

Taking its name from the initials of the words „*Leading International Vision*“, Liv Hospital makes a difference both nationally and internationally with its high-level approach to guest services and patient care services, always striving to get the best medical results held to the highest standards.

Turkey's largest healthcare chain

Liv Hospital is a part of Turkey's largest healthcare chain, Mlpcare Health Group, which has a total of 30 hospitals: 28 in Turkey, 2 abroad, and since November 2023, a further one in Hungary as well.

Specialised physicians supported by advanced technologies

Liv Hospital's physician crew performs at over 50 specialties, making a difference in the industry with its vast spectrum of services ranging from the most complicated robotic oncologic surgeries, pediatric and adult brain surgeries, robotic knee and hip replacements to organ transplants. With the „Regenerative Medicine Stem Cell Production and Application Center“, which was established in accordance with GMP standards within a hospital for the first time in Turkey, all kinds of treatments are provided for neurological disorders, autism, diabetic foot, burns, different musculoskeletal disorders, as well as aesthetic purposes. Special prostate surgeries and progressive non-surgical prostate treatments such as NanoKnife, Thulium and HOLEP are also routinely employed here at Liv Hospital.

Liv Hospital approaches diagnostics and treatment of all pediatric and adult cancer types and aims to utilise groundbreaking technologies in cancer treatment such as MR Linac, a 4-dimensional real-time radiotherapy machine, and brachytherapy, which is used in treating lung-, gynecological-, prostate- and skin cancer.

Scientific studies in collaboration with İstinye University

While Liv Hospital Group provides health services, it also works as a teaching and research hospital in collaboration with İstinye University, which stands out with its studies of artificial intelligence in medicine.

Our patients are our guests, and our guests are our priority

Liv Duna Medical Center aims to provide a unique and excellent patient experience tailored to the specific needs of each individual. Patient satisfaction is our top priority. Our goal is to support the complete and speedy recovery of our patients by addressing not only their physical, but their mental, and emotional health as well.

This is why we also provide preventive services with individual & corporate check up programs at our Check up center. By delivering world-class healthcare services to our national & international patients, we aim to establish Liv Duna Medical Center as a globally recognized name in healthcare.

Patient services

Fast and easy appointments with call center

Liv Duna Medical Center's in-house Call Center offers a fast and high-quality service for guests who wish to make an appointment. We offer the most appropriate guidance by informing patients about the availability of their doctor or the treatment options for their disease, always aiming to provide the most favourable appointments to each patient.

Liv Hospital App

The "Liv Hospital App" offers quick and easy appointment booking, as well as a place where patients can find every single medical report from all across the Liv Hospital chain – no matter the location they visited. The app is an easy and convenient way to check results from the patient's most recent laboratory tests and diagnostic imaging (CT, X-ray, MRI, etc) to medical reports written by any specialty.

Parking services (VALET)

All guests arriving to the hospital by car are met by Parking Services. Our guests who wish to benefit from the valet service

save time by having their vehicles parked in the underground car park, ensuring they have the closest parking option for comfort and convenience.

Efficient patient management with Multidisciplinary Team Meetings (MDTs)

On certain days of the week, physicians from different specialties come together for a multidisciplinary team meeting (MDT), where difficult cases, morbidity and mortality cases are discussed.

Guest relations and satisfaction

All opinions and suggestions provided by our patients are extremely valuable to us at Liv Duna Medical Center. These opinions are carefully evaluated by department managers; our main aim is to increase service quality and make sure our patients are fully satisfied with their care. Liv Duna Medical Center physicians, nurses and allied health personnel work in cooperation with all departments within the hospital, especially Guest Services, to maximize patient satisfaction.

Screening Programs (Check-ups)

To have a healthy life, it is necessary to have regular check-ups. Liv Duna Medical Center provides special, tailored services for all ages and genders with the Check-up programs we offer. This makes it possible to protect yourself from diseases, diagnose existing diseases early and have a healthier life with Liv Duna Medical Center Check-up Clinic!
